Dependencies	4

This module (`incode-module-unittestsupport`) provides a set of testing utilities to support unit testing.

How to configure/use

Classpath

Update your classpath by adding this dependency in your dom project's `pom.xml`:

```
<dependency>
  <groupId>org.incode.module.unittestsupport</groupId>
  <artifactId>incode-module-unittestsupport-dom</artifactId>
  <version>1.15.0</version>
  <scope>test</scope>
</dependency>
```

Check for later releases by searching [Maven Central Repo](#).

For instructions on how to use the latest `-SNAPSHOT`, see the [contributors guide](#).

Known issues

None known at this time.

Dependencies

Maven can report modules dependencies using:

```
mvn dependency:list -o -pl modules/lib/unittestsupport/impl -D excludeTransitive=true
```

which, excluding Apache Isis itself, returns these compile/runtime dependencies:

```
junit:junit:jar:4.12
org.jmock:jmock:jar:2.6.0
org.jmock:jmock-junit4:jar:2.6.0:compile
org.picocontainer:picocontainer:jar:2.15
org.reflections:reflections:jar
org.assertj:assertj-core:jar:3.6.2
com.danhaywood.java:danhaywood-java-assertjext:jar:0.1.0
```

From the Incode Platform it uses:

- [base library](#) module
- [fakedata library](#) module
