This module (incode-module-jaxrsclient-dom) provides JAX-RS Client API, as implemented by Apache CXF.	a	wrapper	around	the

### How to configure/use

#### Classpath

Update your classpath by adding this dependency in your dom project's pom.xml:

```
<dependency>
    <groupId>org.incode.module.jaxrsclient</groupId>
    <artifactId>incode-module-jaxrsclient-dom</artifactId>
    <version>1.16.1</version>
</dependency>
```

Check for later releases by searching Maven Central Repo.

For instructions on how to use the latest -SNAPSHOT, see the contributors guide.

#### **Bootstrapping**

In the AppManifest, update its getModules() method, eg:

#### **Configuration Properties**

There are no configuration properties - the URL a

### **API and Implementation**

The API is:

```
public interface JaxRsClient {
    enum ReprType {
       OBJECT,
       ACTION_RESULT;
    }
    JaxRsResponse invoke(
       URI uri, Class<?> dtoClass,
        String username, String password);
    JaxRsResponse get(
       URI uri,
        Class<?> dtoClass, ReprType reprType,
        String username, String password);
    JaxRsResponse post(
       URI uri,
        String bodyJson,
        String username, String password);
}
```

<1> <2> <3>

The library also provides an implementation of this API, namely JaxRsClient.Default.

### **Example Usage**

From the unit tests:

### **Known issues**

None known at this time.

## **Dependencies**

Maven can report modules dependencies using:

```
mvn dependency:list -o -pl modules/lib/jaxrsclient/impl -D excludeTransitive=true
```

which, excluding Apache Isis itself, returns these compile/runtime dependencies:

```
com.google.guava:guava:jar:19.0
org.apache.cxf:cxf-rt-rs-client:jar:3.1.5
```

For further details on 3rd-party dependencies, see:

- Guava
- Apache CXF
